

SOHAIL SHAIKH

Data Scientist — AI/ML Engineer

sohails07shaikh@gmail.com | +91 8459069171 | Nashik, Maharashtra | [GitHub](#)

SUMMARY

Data Scientist and AI/ML Engineer with hands-on experience building recommendation systems, sentiment analysis models, and fraud detection classifiers. Proficient in Python, SQL, machine learning frameworks, and deploying production-grade AI solutions. Proven ability to collaborate with cross-functional teams and deliver data-driven business results.

EDUCATION

Bachelor of Computer Applications, Sandip University, Nashik 2022 - 2025

PROFESSIONAL EXPERIENCE

Junior Data Scientist (Remote) September 2025 - Present
Techpos International, Canada

- Built and optimized 4 real-time recommendation engines for sales lead ranking and upselling opportunities, improving customer targeting and conversion rates
- Developed sentiment analysis model that enhanced customer insights and supported data-driven marketing strategies with measurable business impact

Associate May 2024 - November 2024
BRV Data Serve Private Limited, Nashik Road

- Developed and maintained data pipelines for analytics and machine learning models, improving data quality and reliability by 30 percent
- Performed model validation, debugging, and created technical documentation for stakeholder reporting and decision support

PROJECTS

TextxGen - Python Package for LLM Interaction

- Created Python package supporting 50+ large language models including GPT, Qwen, Gemini, and Llama. Designed with modularity and documentation to support expanding frameworks.

Financial Fraud Detection System

- Developed real-time fraud detection classifier using XGBoost achieving 95+ percent accuracy with automated CSV upload and feature engineering pipeline

Image Classification with Convolutional Neural Network

- Built CNN model for image classification on CIFAR-10 dataset achieving 85 percent validation accuracy using data augmentation and regularization techniques

TECHNICAL SKILLS

Programming Languages: Python, R, Dart, SQL

Machine Learning: Predictive Modeling, Natural Language Processing, Computer Vision, Deep Learning

Frameworks and Libraries: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Keras

Tools and Platforms: Git, GitHub, Tableau, Jupyter Notebook

CERTIFICATIONS

Data Science Internship Certificate, Personifwy, October 2024 - November 2024

NASA International Space Apps Challenge Participation Certificate, October 2024

HackFusion 2.0 Hackathon Participation, February 2025

ACHIEVEMENTS

National Level Target Ball Championship 2024 - Third Runner Up
